What is In-telligent?

The In-telligent app is a personal safety and emergency communications platform designed to keep you safer and more informed during emergency situations and time-sensitive events. These events may include times when your personal safety is threatened by other people (such as an active shooter) or natural occurrences (such as an earthquake or severe storm). They may also include those moments when time-sensitive communication is critical, such as when you need to reach loved ones immediately or you have an urgent need to contact emergency support or local authorities, but don't know their number.

Why do I want it?

In-telligent allows us to send you critical and time-sensitive messages pertaining to your building. First and fast communication from In-telligent can mean the difference between life and death, making it an absolutely essential tool in keeping you prepared for an emergency situation.

How do I download In-telligent?

Downloading the app is very easy! Text EMBER to 833-369-3800, or search for In-telligent on the App Store or Google Play. Complete the simple registration process, search for Mountain Ember, and then hit Connect!
